DETAILED ACTION

Drawings

Figures 11-16 should be designated by a legend such as --Prior Art-- because only that which is old is illustrated. See MPEP § 608.02(g). Corrected drawings in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.121(d)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Specification

The disclosure is objected to because of the following informalities: A brief description of Figure 16 is given, however, no further description of the figure is included in the specification. It is suggested that a detailed description of the figure be included in the specification.

Appropriate correction is required.

Allowable Subject Matter

The following is a statement of reasons for the indication of allowable subject matter:

Claims 1-10 are considered allowable because the present invention comprises a synchronizing signal processing circuit comprising a first counter, a second counter, a first gate, a second gate, a synchronizing pulse producing circuit, and a reset signal producing circuit. The reset signal producing circuit outputting a reset signal to the second counter when receiving the first synchronizing signal from the first gate circuit and the self-running synchronizing pulse

Art Unit: 2637

form the self-running synchronizing pulse producing circuit. The closes art, Hatakenaka (US Patent 5,459,419) shows a similar circuit including a first counter, a second counter, a first gate, a second gate, and a synchronizing pulse generating circuit. However, Hatakenaka fails to teach reset signal producing circuit outputting a reset signal to the second counter when receiving the first synchronizing signal from the first gate circuit and the self-running synchronizing pulse form the self-running synchronizing pulse producing circuit. This distinct feature has been included in independent claims 1 and 6 rendering them allowable. Claims 2-5 and 7-10 are dependent on allowable claims 1 and 6, respectively, and are thereby allowed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

This application is in condition for allowance except for the following formal matters:

Drawing labels must comply with all drawing objections, as indicated above, or specifically traverse each drawing objection not complied with.

Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.
